ANIKET MAZUMDAR

Software Developer   (7 yrs exp)

SUMMARY

• Seasoned **JavaScript UI Developer** with a **seven-year** track record in crafting responsive templates for websites and applications, prioritizing impeccable **accessibility standards**.

• Proficient in a diverse set of technologies, including **React JS, Redux, JavaScript, TypeScript, Sass, Storybook, RTL, Jest, GraphQL, Git** etc.

• **Specialized in React JS-based web app** development and design.

• Successfully designed and developed various web applications, such as **eCommerce platforms, travel booking systems, hotel portals, educational websites, and content management systems**.

• Expertise in creating user-friendly and visually appealing interfaces adaptable to various devices and screen sizes.

• Skills include **building high-performing presentation layers, developing reusable components** and **optimizing performance**.

• Thrives on solving UI challenges, collaborating with cross-functional teams, and staying updated with the latest industry trends.

• Values effective communication and commits to continuous learning as integral aspects of professional growth.

EXPERIENCE

Publicis Sapient

MAR 2022 - CURRENT

Experience Engineer

• I gained hands-on experience with **React JS** and **Next.js.**

• I improved my skills in designing **responsive** templates using **CSS** and **SasS**.

• I focused on creating **accessible** templates that adhere to the **WCAG** standard.

• I utilized **React Testing Library** and **Jest** to mock functions and write unit tests, ensuring comprehensive component coverage reports.

• I implemented **GraphQL** queries and mutations to interact with server-side data.

• I developed a **Storybook** for each component individually, allowing me to showcase and interact with components in an isolated development environment.

• I used **Jira** and **Confluence** for tracking user stories and streamlining agile planning processes.

• I followed the **Scrum/Agile** methodology, involving iterative application development, weekly sprints, daily stand-up meetings, and reporting backlogs to customers.
